

# EasyClip<sup>®</sup> Xpress

# EasyClip® Xpress

## Constant dynamic compression

EasyClip allows for dynamic compression across the osteotomy site, avoiding pin tract infections and stress risers.<sup>1</sup>

## Patented forceps<sup>2</sup>

Instrumentation allows for simple removal, repositioning or adjusting staple sizes intra-operatively.

## Sterile

Compact kit includes staple and all instruments needed for procedure. Sterile, single-use kits may reduce the risk of cross-contamination and post-operative infection, improving patient safety.<sup>3</sup>

## Foot & Ankle

A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of any particular product before using it in surgery. The information presented is intended to demonstrate the breadth of Stryker product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use before using any Stryker product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area. Stryker Corporation or its divisions or other corporate affiliated entities own, use or have applied for the following trademarks or service marks: Asnis, Stryker.
